SCORE BAR

Lucky Luke's Face: Lucky Luke's face is shown at the top-left of the game screen, on a panel made of three pieces of wood. Each time Lucky Luke is hit by an enemy or by the explosion of a dynamite charge, one of the pieces disappears. When Lucky Luke has been hit 4 times, you lose a life. The number displayed next to Lucky Luke's face tells you how many lives you have left.

The B (Bonus) Icon: The B icon is shown to the right of Lucky Luke's face. The number displayed to the right of the Bonus icon tells you how many Bonus icons you have picked up in a level.

The Dynamite Charge: The dynamite charge is shown to the right of the Bonus icon. The number displayed to the right of the dynamite tells you how many dynamite charges you have.

LUCKY LUKE

The Dollar Symbol: The dollar symbol is located to the right of the dynamite charge. The number displayed to the right of the symbol tells you how many dollars you have already collected.

The Collected Objects: in certain levels, you must collect objects to solve puzzles. When an object is in your possession, it is shown at the top right of the screen.

BONUSES

Throughout the game, you can collect the following bonuses:

The Lucky Luke Golden Head: This gives you an extra life.

The Sheriff's Star: This bonus credits your score bar with an extra energy point, unless the energy bar is already at its maximum.

The Dynamite Charge: You can use a charge to blow up obstacles or to get rid of particularly tough enemies.

The Dollars: There are many bonuses spread around all the levels in the form of dollars. Collect as many of them as you can, because you can use them to buy either a life or a password.

LUCKY LUKE

The B (Bonus) icon: 4 Bonus icons are cleverly hidden in each level of the game. If you find all the B icons hidden in a level, you will gain access to one of the three bonus levels of the game, at the end of the level.

Rintocan "checkpoints": Rintocan will appear in some levels. When this happens, if you pass in front of him, your position in the current level will be saved.

HOW TO BUY A LIFE OR A PASSWORD

When you have collected a certain number of dollars, you automatically gain access to the following level "Flatshoe The Hawker's wagon". You can then choose to buy an extra life (30 dollars) or a password (100 dollars). To make your choice, use the left and right Directional buttons, then confirm by pressing the **X** button.

If you have bought a password, the box to the left opens to show a password made up of four faces. Note it carefully, because you won't be able to see it again once you've left Flatshoe's level.
